

Acknowledgments

The writing of this book is the result of a long journey over several years, during which we met many people who gave us a significant contribution. The time has come to thank them for coming with us on this journey through self-organization in schools and innovative learning environments.

First of all our thanks go to Prof. Luigi Berlinguer, Minister of Education from 1996 to 2000, who agreed to write the Foreword with the same enthusiasm with which he leads the National Committee for the Development of Scientific and Technological Culture of the MIUR.

A second sincere thanks goes to Arduino Salatin, principal of the Salesian University Institute of Venice (IUSVE), board member of the National Institute for the Evaluation of Education Systems (*Invalsi*) and expert consultant for the MIUR, for at least three reasons. The first one because regarding the subject of innovative learning environments, he put us in contact with some of the most experienced people in the sector; the second reason is because he was available for a constant exchange of ideas on all of the aspects of our research; and the third reason because he agreed to write the Afterword, thus giving a greater value to our contribution in a broader context.

A third heartfelt thanks goes to Giuseppe Cosentino, former head of the education department, chief technical secretary of the minister and special commissioner of *Invalsi*, for the fruitful interactions and discussions on the topic of scholastic autonomy.

Among the experts with whom we had the opportunity to interact and whom we thank here for their willingness to discuss and suggest some relevant case studies, we mention Marco Rossi Doria, former under-secretary of the MIUR; Anna Maria Aiello, president of *Invalsi* and full professor of developmental and educational psychology at “La Sapienza University” of Rome; Dino Cristanini, former director of *Invalsi*; Walter Moro, president of the Center for the Democratic Initiative of Teachers (Cidi) of Milan; Michele Pellerey, former rector of the Salesian Pontifical University of Rome; Mario Fierli, former director of the MIUR; Lucio Guasti, former full professor of general education at the Catholic University of Milan; Silvano Tagliagambe, full professor of philosophy of science at the

University of Cagliari; Corrado Petrucco, associate professor of experimental pedagogy at the University of Padua; Maurizio Gentile, assistant professor of special education and pedagogy at the University of Verona; Franco Azzali, president of “Studio Pegaso”, professor of general pedagogy at the IUSVE.

Thanks also to David Perkins, professor of teaching and learning at the *Harvard Graduate School of Education*, for a discussion on learning environments held in Padua in March 2013 on the occasion of the International Education Gala titled “At School With Love”.

We are grateful to Antonella Zuccaro, the chief researcher at *Indire* (a research institution of the Ministry of Education), for helping to improve the focus of some aspects of our research and for having indicated some notable case studies to us. We remember the stimulating seminar meetings in Fiesole between 2012 and 2014 on the occasion of the research project “The Integration of the Sciences and Workshop Teaching”.

Thanks to Ivana Summa, a former principal and an adjunct professor of education sciences at the University of Bologna, for the opening words of our research and for having dealt with us on school organizational models. We especially remember a meeting at the High School of Public Administration in the snow of a freezing Bologna.

A heartfelt thanks to Cinzia Mion, a former principal, vice-president of the National Association of Principals and member of the Educational Cooperation Movement, for the enthusiasm with which she discussed the objectives of our research and for having indicated relevant experiences and conferences.

A heartfelt thanks to all the principals, teachers and non-teaching staff of the 14 schools involved in the case studies.

A sincere gratitude goes to Salvatore Giuliano, principal of the famous “Majorana” school in Brindisi, for believing in change and for having managed to start from small innovations and arrive at revolutionizing a school, where technology is not an end in itself but a means to making learning more effective. We remember Salvatore and the teachers Gioacchino Margarito and Salvatore Tiralongo for the welcome they gave us and the hospitality they showed us in Brindisi. We thank them for the fruitful interviews and memorable business dinners at the marina.

A heartfelt thanks goes to the teachers of the “Gioia” high school in Piacenza, to the teachers Elena Gabbiani, Cristina Bonelli and Franco Marzaroli for having testified to us how to benefit from the territorial communities of practice for educational purposes and how to develop the didactics of the product and, finally, for having met us at school during a scalding August.

We are grateful to Cristina Bonaglia, principal of the “Fermi” school in Mantua, for the passion shown to us during the numerous interactions. We congratulate her on succeeding in giving an international scope to her school and on having created innovative spaces for learning environments. We remember the numerous meetings both at school and at conferences of

the Italian Teachers Association and the Skype videoconferences with her from Boston while she was looking for more original ideas for her school.

We are grateful to Mike Price, rector of the Collegio del Mondo Unito (United World College) in Duino, for having introduced us to this reality, unique in the Italian panorama, of a border school, open to the territory, with an international program rich in community activities and volunteer work, including the participation in the international peace movement. The sea view from the Karst hills is unforgettable.

We are grateful to Maria Grazia Carnazzola, principal of the “Piazzi Lena Perpentì” school in Sondrio, for showing us how to best use the resources present on the territory and for having strengthened the creativity of teachers and students in the face of a shortage of teaching equipment.

A special thanks goes to Franca Zappini, former principal of the “Russell” high school in Cles, for having explained to us how to motivate students with a flexible schedule, how one can simultaneously retrieve and enhance excellences throughout the year. We apologize for interrupting her summer bike rides among the Trentino valleys.

We want to thank Maria Bernardi, former principal of the “Barsanti” school in Castelfranco Veneto, for testifying to us that, in addition to welcoming students, there is also a need for welcoming parents and that peer teaching can be used to help new students. Regarding our summer meeting, we remember the professionalism with which a school is directed.

We thank Anna Morrone, former principal of the “Randi” school in Ravenna, for showing us what it means to develop and carry on a shared culture needed to face the daily educational challenges, to believe in teachers and to enhance experimental teaching methodologies, to be able to cope with problems by investing in education. We thank her for her willing help during the sultry days of August inside an empty school.

A mention of merit goes to Margherita Carloni, principal of the Comprehensive Institute in Montespertoli, for letting us become acquainted with the *Global Curriculum Approach*, the famous *Without a Backpack* didactic structure and the ecological paradigm in the planning of teaching methodologies. We remember this principal’s love of and passion for school, as well as for having accompanied us to the station through the splendid landscape of the Tuscan hills.

A heartfelt thanks to Giovanni Sapucci, principal of the “CEIS” in Rimini, for having introduced us to a real educational village, where people, the inspiring spirit of the school and the spaces, create a learning environment that is unique in its kind, open to diversity.

A further thanks goes to Caterina Manco, former principal of the “eSpazia” Comprehensive Institute in Monterotondo for having introduced us to, among other things, teacher coaching, to teacher caretaking and to the open-plan classrooms. We also thank her for having welcomed us while she was waiting anxiously for the birth of her grandson.

Gratitude must be expressed to Enrico Sitta, teacher and vice-principal at the “Marconi” school in Modena, for having granted us a fruitful interview in August when the school was closed while sitting outdoors in a café.

A sincere thanks to Tiziana Cavedoni, principal of the “Giovanni XXIII” in Tricesimo, for having introduced us to the teaching workshop; to Fernanda Tucillo, former principal of the “Ristori” school in Naples, for introducing us to a community school, open from 8.00 a.m. to 8.00 p.m., which addresses the social needs of parents and students in the well-known Forcella district of Naples. We remember the arrival at the station in Naples and the unusual transportation to school by scooter, the only way to move around easily in the traffic of the city.

A heartfelt thanks also to Cesare Moreno, a very valid and well-known president of the “Maestri di Strada” Association in Naples, and to Salvatore Pirozzi, a member of the “Quartieri Spagnoli” Association in Naples, for the insights that emerged during our discussion in Piazza Dante about the learning environments addressed to the reintegration of students who had dropped out of school.

A big thank you to Francis Contessotto and Andrea Vitulli, former principal and director of the “Madonna del Grappa Canossian Institute” in Treviso, for having supported and encouraged Stefano De Marchi in his research, in order to enrich the school where he works with the experience of other schools. Thanks to Mauro Bordignon, former principal of the “Pio X Episcopal College”, now director of the *H-International School* in Roncade (province of Treviso), for the continuous and concise comparison of the multiple themes of school innovation.

The ADI (Italian Teachers’ Association) seminars were a great opportunity to keep up-to-date on national and international educational and organizational innovations. We thank the tireless Stefania Palazzini and Giuseppe Malavolta, directed by their wise and inspired president Alessandra Cenerini, for the residential seminars in late summer in Lecce and Monte Mario in Rome, characterized by a welcoming and pleasant atmosphere.

Many thanks to numerous colleagues of engineering economics and management: primarily Cipriano Forza, full professor at the University of Padua, for his rigorous suggestions on the methodological aspects of research; Cinzia Battistella, associate professor at the University of Siena, and Guido Orzes, researcher at the Free University of Bolzano, for their constant willingness to support us in the bibliographic research and data processing; Giovanni De Zan, PhD in industrial and information engineering, now project manager at Fincantieri, for having drafted the questionnaires on capabilities together with us. Gianluca Biotto, PhD in industrial and information engineering, now innovation and research director at InfiniteAREA in Montebelluna, for his tips on graphic design. Thanks also to all the members of the Laboratory of Management Engineering (LabGest) of the University of Udine for discussions and exchanges of views on the research topic.

Alberto F. De Toni takes this opportunity to thank Maria Grazia Nardiello, former director-general of the MIUR for the higher technical education and for the relations with the educational systems of the regions, for the efficient collaboration during the reform of technical and vocational education since 2007. He also thanks Sabrina Bono, chef de cabinet of the MIUR, and Carmela Palumbo, head of the MIUR department for the planning and management of human, financial and instrumental resources, for their helpfulness and attention during the establishment of professional degrees and their connection with higher technical education.

Special acknowledgments for allowing us to use their images go to *Educational Technology & Society*, *The International Review of Research in Open and Distance Learning*, Springer Nature, *Complicity: An International Journal of Complexity and Education*, Emerald Publishing Limited, Informs, Sage, ISEDI, the Christensen Institute and the Nyc Department of Education.

The thanks to all these people do not take any responsibility away from the authors, who are solely responsible for any omissions and errors in the text.

Finally, a heartfelt thanks to our families for the time we took away from being with them. From Stefano, in particular, an important thanks goes to his wife Raffaella for having supported the research from the beginning, for her patience, for having taken care of the family during his absences and for having proofread the book.

by Alberto F. De Toni & Stefano De Marchi
